Diploma in Information Technology student with hands-on experience building database-driven and geofencing-based systems using C#, PHP, and MySQL. Developed multiple academic projects involving real-time tracking, user authentication, and UI/UX design. Seeking an internship as a Junior Software Engineer to apply technical skills in building scalable and user-focused applications.

EXPERIENCE

Geofencing-Based Monitoring system For MLSB

Final Year Project | Tech: C#, MySQL, GPS/Geofencing Logic
march 2026 – Present

- Designed and implemented a geofencing-based monitoring system to validate bus route compliance, reducing route deviation detection time through automated tracking
- Developed GPS-based boundary logic to detect unauthorized movements and trigger alerts
- Structured and managed relational database (MySQL) for bus routes, trip records, and compliance tracking
- Applied research-based algorithms to improve detection accuracy and system reliability
- Tested system using multiple simulated route scenarios to validate performance

Unity System Prototype

Mobile Application Design | Tech: Unity, C#
March 2026 - PRESENT

- Developed interactive Unity-based prototype with user authentication and UI navigation flows
- Implemented responsive UI components and resolved audio/UI scaling issues during runtime
- Improved usability through iterative testing and debugging

Online System Delivery

Database Project | Tech: MySQL
March 2025 – August 2025

- Designed and normalized relational database schema for order, customer, and delivery modules (3NF)
- Wrote optimized SQL queries for CRUD operations and reporting
- Improved data consistency and reduced redundancy through proper relationship mapping

EDUCATION

Diploma in Information Technology

University Of Kuala Lumpur (MIIT)
July 2024 - present

- Web & design focus: Specialized in Front-End Development and UI/UX Principles
 - Relevant coursework: Advanced Database Systems, Software Engineering, and Object-Oriented Programming (C#).
 - GPA 3.84

TECHNICAL SKILLS

- Programming:** C#, PHP, JavaScript
- Database:** MySQL
- Web Development:** HTML, ASP.NET
- Tools & Design:** Figma, Canva, Unity

SOFT SKILLS

- Team collaboration
- Adaptability
- Time management
- Communication
